Columbia, South Carolina 29211

RE: Docket No. 2005-385-E (Net metering) : Request for Discovery of the Additional Net Metered Costs

Referred to in Comments during the Briefing of February 14  
and in Subsequent Responsive Testimony by the Representative  
Esquires and Witnesses of the Three Utilities, Duke Energy,  
Progress Energy, and SCE&G

Dear Mr. Terreni,

Please direct the three investor-owned utilities, SCE&G, Progress Energies Carolinas, and Duke Energy to provide copies of documents enumerating the data pertinent to determining any and all the additional metered costs referred to in the testimony and comments by Mr. Williams responsive testimony in the case of Docket 2005-385-E (net Metering). These are the specific additional costs incurred only by the net meterer and his/her net metered system. These costs should include, but are not limited to, the following and any other items that are germane:

1. Cost of the meter under each tariff
2. Cost of said meter maintenance
3. Cost of installation
4. Cost of reading the meter
5. Costs of billing
6. Costs of transmission and distribution systems used by the customer when his/her generation is not sufficient to meet his/her demands
7. Costs of transmission and distribution systems used by the customer when the customer generator puts power onto the grid for resale by PEC
8. Any other costs of goods and services not in the list above but are considered in the calculations for determining fees, charges, and tariffs for net metering customers.

In addition, I will need to know the costs of the proposed types of extra safety equipment utilities plan to use and install after a customer has already installed a net metering system approved by each utility. Finally, include the cost of using each utility's workmen phones and phone usage when working from the customer's home site. This is necessary to know since the utilities demand use of the customer's own phone when dealing with customers' net metered systems.

Sincerely,

Pamela Greenlaw

Intervenor
